FRISCHHUT becomes part of Tiroler Rohre GmbH – Your provider for water management!

Dear business partners,

At FRISCHHUT everything revolves around cast iron and of course around YOU - and this also in the future! As of 01 July 2022, we will become part of the owner-managed family business of Tiroler Rohre GmbH (TRM).

FRISCHHUT and TRM are leading European manufacturers of cast iron products for the water industry. FRISCHHUT has been focusing on fittings, as well as special castings for mechanical and plant engineering since 1945. In the future, FRISCHHUT will appear on the market as an independent, autonomous company/brand. FRISCHHUT would like to continue and even further expand the long-standing and successful business relations with you. TRM, based in Hall in Tyrol, has been developing, producing and marketing pipes and piles since 1947 (for further details please visit: www.trm.at).

Due to our similar history as a family business and our enthusiasm for cast iron, we are a perfect match. Together with TRM, we are a full service provider for water management. The water business is a "people's business". Your familiar contact persons at FRISCHHUT will continue to be available for you in the future. Of course, contracts concluded in the past will remain valid. Our goal is to continue to inspire you as a customer!

We are looking forward to a common partnership.

„Glück auf“ (traditional German miners' greeting), your

Christoph AIGNER
